Your source for the most versatile pallet recovery
and repair equipment available

"The Difference is Engineering"

- "*Smart Saw*" is multi-functional: designed for "*repair*" (1-Person) or "*recycling*" (2-Person) operations of "GMA STYLE" pallets & other stringer pallets.

- Standard 10 HP, 3-phase, electric motor with gear reduction drive.

- 20' standard "M42 bi-metal" band saw blade

- Air actuated, 3-position, roller table and table extension easily positions GMA pallet for board removal.

- Machine provided with "*advanced safety measures*" in place, including, among others, interlock switches for perimeter guarding and cabinet doors, canopy guarding with front & back portions that move up & down with the roller table, hydraulic blade tensioning pressure safety switch, and "Monitoring Safety Relay", or MSR, to alert users of safety malfunctions.

- Designed to QUICKLY (as a "1-person" operation) cut out damaged boards, including "bottom" deck boards, "top" lead & other deck boards, as well as "MIDDLE" & "OUTSIDE" stringer boards.

- Also designed, as a "2-person" operation, to process the disassembly / tear-down of GMA pallets for "**INCREASED LUMBER RECOVERY**".

- *Smart Saw* can be "easily integrated" into a full line pallet repair system.

- *Smart Saw* can be set up with optional conveying equipment to handle discharge from backside of machine, as well as alternatives for infeed of pallets to *Smart Saw* and outfeed of pallets already prepped and going to repair tables.
